Pegasus Hydro-Sensation User Operating Instructions

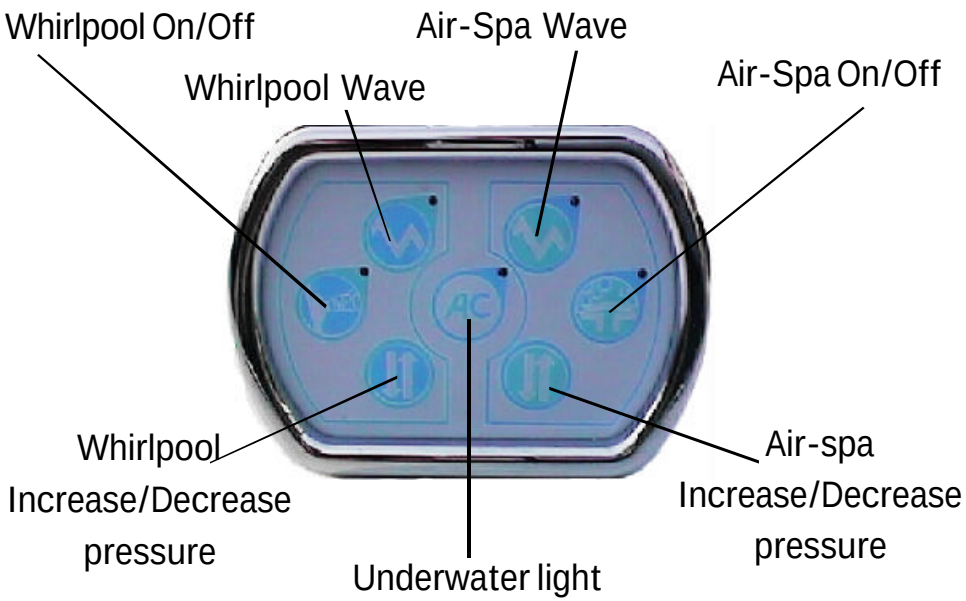
- ✔ Switch on the R.C.C.B. which is located outside the bathroom.
- ✔ Fill the bath with water to a level at least two inches above the level of the jets.
- ✔ When you are in the bath, turn on the whirlpool by pressing the appropriate button on the left ahnd side of the multifunction control pad. The intensity of the whirlpool jets can be regulated by pressing button with the up and down arrows on the left hand side of the control pad.
- ✔ Pressing the third button enables the whirlpool "Wave" feature which automatically varies the water pressure between high and low.
- ✔ The Spa system can be turned on by pressing the appropriate button on the right hand side of the Multi-function Control Pad. the pressure of air can be increased or decreased by pressing the up and down arrows on the control pad
- ✔ Pressing the third button enables the Air-Spa "Wave" feature which automatically varies the Air pressure between high and low.
- ✔ The underwater light can be operated by pressing the button marked "AC".

NB Approximately 15 minutes after the bath has emptied, the auto purge hygiene feature will start and blow warm air through the pipework for a period of about four minutes.

- ✔ Switch off the R.C.C.B. after leaving the bathroom. Once a month test the R.C.C.B. by pressing the button marked 'T'. This should result in the switch on the box flicking down. If the switch does not respond in this way **do not use your whirlpool - contact your electrician.** If the switch responds normally the R.C.C.B. may be reset by returning the 'off' switch to the upright position.
- ✔ Only use specially formulated bubble bath in your whirlpool - ordinary bubble bath will foam excessively.
- ✔ Ensure that access is allowed to the pump and system for service and maintenance.
- ✖ Newcomers to whirlpool bathing or occasional users should only use the whirlpool for 10 minutes before resting. Experienced users will enjoy 15-30 minute sessions.
- ✖ **Do not** leave young children alone in the Whirlpool - as with any body of water.
- ✖ Sponges, flannels and soap should not be used whilst the system is operating.
- ✖ **Do not** use abrasive cleaning pads or scouring cleansers.
- ✖ **Do not** allow the pump to be run for a period of more than one hour continuously.

Whirlbath Hygiene Products

Special cleansers & sterilisers are available to maintain your whirlpool in a hygienic condition. Sterilising tablets are available for use after each bath and Cleansers for periodic purging of the whole system, such as after holidays etc - Please contact your bathroom retailer for supplies.



Turbo Boost controller

This control which is normally located on one corner of a bath can be rotated in a clockwise direction to allow Surplus air from the Spa nozzles to turbo charge the whirlpool jets. By experimenting with this control and the features of the electronic control it is possible to get up to 12 different types of massage from your Pegasus ***Hydro-Sensation*** whirlpool System. On of the most popular is to select "whirlpool On" and "Spa On" with "Air Spa Wave" variation.

Auto-Purge occurs after automatically approximately 15 minutes after emptying bath. Ensure that the Turbo controller is open (anti-clockwise).

Do not turn the power off at the ELCB until after Auto-purge has occurred.

27+ Hydro-Sensational Massages from Just one whirlpool system !

Whirlpool Sensations - Turbo Control closed
